Recruitment Team
Sinopec – Seismic Project
Saudi Arabia

Subject: Application for Seismic Project HSE Advisor – Field-Based, Saudi Arabia

Dear Recruitment Team,

I am writing to apply for the position of Seismic Project HSE Advisor. I am a NEBOSH IGC-certified HSE professional with over 25 years of field-based QHSE experience in oil and gas, gas processing and pipeline projects across Oman, Kazakhstan, the UAE, Qatar and Turkmenistan. I would welcome the opportunity to support your field operations in Saudi Arabia.

Your advertisement emphasises incident investigation, field inspections and corrective action follow-up, which have been central to my career. As Project HSE Manager on Tengizchevroil's Future Growth Projects, I investigated incidents using root cause analysis and achieved a 98% corrective-action closure rate across a 5,000+ workforce. In my current role with Petrofac on the Galkynysh Gas Field O&M Project, I perform field HSE audits, evaluate high-risk tasks, guide HAZID and JSA risk assessments, and support ICAM-based investigations.

I also have extensive experience identifying unsafe practices and turning them into practical QHSE awareness and training. I have delivered safety inductions for new hires and subcontractors, hands-on training for high-risk activities, and safety leadership training for more than 200 supervisors. As a certified Competence Assessor, I assess competence after training through practical observation in the field.

Much of my career has been spent as a contractor HSE lead on operator-led projects for PDO, Tengizchevroil and CPC. This involved working within client HSE systems, such as Chevron OEMS, and closing out corrective actions. These projects achieved milestones such as 8 million man-hours without LTI on the PDO Nimr-G and Karim West projects.

I would value the opportunity to discuss how my field experience can contribute to safe, compliant seismic operations. Thank you for considering my application; my CV is attached for your review.

Yours sincerely,

Joseph Arockia Arun Louis Miranda
